Edupepe Whitepaper

Introduction

In a world where digital innovation often focuses on profit and speculation, Edupepe emerges with a different purpose — to transform the power of memes and blockchain into a real movement for humanity. Edupepe was born from a simple yet powerful dream: to help children in orphanages and those from underprivileged families gain access to proper education, starting from Indonesia, and eventually expanding to other regions in need. While many cryptocurrency projects chase hype and short-term gains, Edupepe carries a meaningful mission — to turn laughter into learning, using meme culture as a force for positive change. Through this initiative, every transaction, every token, and every contribution will bring us closer to building schools, improving orphanages, and giving children the chance to dream again. Edupepe believes that charity and crypto can coexist, creating a new era of financial empowerment and social responsibility. This is not just another meme coin — it's a movement where humor meets hope, and technology meets compassion. > From Edupepe to the world — every cent from you for those who need education but cannot afford it.

Auto-Charity Mechanism

Edupepe integrates an automated charity mechanism that ensures transparency and accountability. Every transaction within the Edupepe ecosystem, whether online or offline, is recorded permanently on the blockchain and can be audited by anyone — not only by the community but by the public at large. This ensures that all charitable activities, school construction, and donations can be transparently monitored by every holder and supporter, establishing trust and integrity within the community. All wallet access will remain under the project founder's control to maintain the project's security and efficiency. However, all financial movements will remain public and fully verifiable on the blockchain.

Charity Distribution and Community Fee

Every year, Edupepe allocates funds collected from transaction taxes as follows: - 50% of the total annual tax revenue will be directed to educational foundations and charity programs. - 40% will be distributed to the Edupepe community as appreciation for their support and engagement. - 10% will be allocated for Edupepe's operational and developmental costs. This balanced structure ensures both continuous charity efforts and long-term project sustainability.

Presale and Fund Allocation

Edupepe will launch its presale at Phase 4, with a total of 50% of the total token supply allocated for presale. Half of the raised funds (50%) will be directly used to construct the

first Edupepe School — a free educational institution built from the remaining presale funds and future trading tax revenues. No airdrop will be conducted, as annual community rewards are already part of the charity-based distribution system.

Edupepe Foundation and First School

Edupepe Foundation will be established simultaneously with the first Edupepe School — a tuition-free school fully funded by presale donations and trading tax revenues. The foundation will serve as the legal and humanitarian branch of Edupepe, ensuring that all charity actions are sustainable and impactful.

Roadmap Overview

- Phase 1: Concept and Branding Development - Phase 2: Website, Social Media, and Whitepaper Release - Phase 3: Community Building and Marketing Campaign - Phase 4: Token Presale Launch - Phase 5: Foundation Establishment & Construction of the First School - Phase 6: Token Listing and Ecosystem Expansion - Phase 7: International Charity and Educational Partnerships

Tokenomics

Total Supply: 100,000,000,000 EDUPEPE Blockchain Network: Solana Token Distribution: - 50% Presale Allocation - 20% Liquidity & Exchange Listing - 10% Foundation Reserve (Charity & Emergency Support) - 10% Community Rewards (Annual Distribution) - 5% Development & Operational Budget - 5% Marketing & Collaboration Fund Edupepe is designed to ensure long-term growth, transparency, and real-world impact through verifiable blockchain transactions and a focused humanitarian mission.

Conclusion

Edupepe is more than a token — it's a movement. By combining humor, technology, and compassion, Edupepe turns every transaction into hope. Each holder becomes part of a revolution that transforms digital value into educational opportunities for children who deserve a brighter future. Edupepe stands for transparency, integrity, and the belief that laughter can indeed build schools.
